General Notes:
- all signals and crosswalks contingent on DOT approval
- repave and restripe roadway throughout
- designate unrestricted parking to 2-hour parking throughout
- add pedestrian level sidewalk lighting throughout
- remove + replace unhealthy median and parkway trees
- add new street trees in parkways and median where possible

- modify traffic signal for new lane configuration, add LPI
- re-stripe for R-Turn only lane and straight-left to ERB
- close off Alumni Ave spurs to York and ERB; convert to cul de sac street to prevent currently conflicting cutthrough vehicular traffic; maintain required hammerhead turnaround; create plaza at corner.

- close median gap to prevent unsafe u-turns; convert painted median to landscaped median
- options for bike connection from York to ERB to be explored.
General Notes:
- all signals and crosswalks contingent on DOT approval
- repave and restripe roadway throughout
- designate unrestricted parking to 2-hour parking throughout
- add pedestrian level sidewalk lighting throughout
- remove + replace unhealthy median and parkway trees
- add new street trees in parkways and median where possible
General Notes:
• all signals and crosswalks contingent on DOT approval
• repave and stripe roadway throughout
• designate unrestricted parking to 2-hour parking throughout
• add pedestrian level sidewalk lighting throughout
• remove + replace unhealthy median and parkway trees
• add new street trees in parkways and median where possible

re-designate as drop-off parking only
remove existing traffic median to make room for parking protected bicycle lanes; replace trees in parkway
new bus refuge island, relocate shelter

add new shelter to Yosemite bus stop
new bus refuge island with new shelter

parking protected bicycle lane
add sidewalk extensions on the east and west sides
add 2-way cycletrack within north parkway between ERB and Maywood (1/4 mile)
